

Obstacle Notes

The old crown point high school used to have a very cool 7 stair outside of the gymnasium. In the center was a flat bar. Every skate in town used to test themselves on that as it was the only stairset that was good. Many tickets were handed out over that obstacle. Can the 7 stair be rebuilt in memory of the long gone spot? I can supply photos for dimensions.

Spine with cutoff than you can roll over smoothly

Maybe a few benches to sit at that you can also grind on

I really do like how CP skatepark has "flow" to it where you can go from the mini-ramp/spine and still connect to a line on the box or ramp.

From talking to everyone at the CROWN point skatepark we need a bowl everyone wants a bowl but I think it should be nice enough for bikers and skateboarding

Have the lines linear, so riders do not cross each other during their run.

Wood ramps no concrete

The park layout is already awesome don't let non locals make it street

Bowl- similar to the new one in Hammond Indiana not a huge bowl

Bowl combination, I would like different heights to the bowl and unique shape

bank to ledge

Thick Coping

Concrete

Just want all of them to be smooth ??»??»??»

Ramps for all skill levels

I would like to see a bowl with transitions similar to the krush bowl but in a different shape. Something different and new

The bank/wall ride would be nice if it looked like a tree planter

mellow banks to stairs with medium round rails

Please just take a good look at highland, hessville and lake station and build something different. Highland is street orientated (ledges and stairs) and hessville is mixed and way more popular.

Make

Hessville style

Pyramid; Fun Box; with Ledge and Drop

Really like the new hestville skatpark but its a to far way

Pyramid w/ fun box and ledge

Having small mini ramps helps people learn to drop in!

Nice quarter pipe with good transition

Please have bigger half pipe with good vert that throws you up

Please have bigger quarter with vertical transition

Add a box jump that's not too long and has a mellow landing 4 to 5 ft tall

Nice box

Rollers

Pyramid

Rail down the a frame should be able to hit from every possible side. (No drop on one side of the rail.

Mini ramp

Good flow. Layout that accommodates many skaters at the same time.

Box jumps

Please add a bowl!

Have a good half pipe with good transition

Expand and have the park be a lot larger overall. Make it a park people will come from all over to go to.

Vert wall followed by box. For clearing and learning tricks whilst practicing clears.

Dyer skatepark hip

A long vert wall not a short one like at sherrivilles skatepark

A fly box would be amazing, we have 2 very very small ones and they are okay but something bigger would be cool

If there is a roll in to a box jump there needs to be a quarter at the end of the run to send the rider back to the starting

Scooter friendly

Don't let this park end up street its the only vert park left

Box- something that is wide enough to manual. Not high enough for people to sit on

euro gap not to small

2 ledges set a part on the same side

Mini Ramp with Extensions

Concrete

More open flat space

There are no good box jumps around.

the double-sided curb should be like the ones found in bank parking lots, maybe even painted

ledges, round flatbar

Would love to see a good mix of street and transition. 50% street stuff 50% transition stuff will make everyone in the area happy I think. Something for everyone.

A nice slappy curb somewhere

It

Cali jeff is the man

Fly Box; Kicker, Flat, to Down Ramp with Hubba

Mini ramp 5 to 6 ft

Nice spine with coping that doesn't stick out

Have bigger and better mini ramp with spine

Have bigger and better mini ramp

Big half pipe 6 to 7 ft tall with extensions and a vert wall

Nice spine

Big box

Bump to rail

A decent down rail. Can not be to long by any means. Should be a little easier to skate than a regular street handrail but not to long where every trick has to be locked in perfect and held

Flatbar

Room for creativity, everything can be skateable!

Big bowl

Better mini ramp with spine

6ft halfpipe

Well we have a really decent half pipe at the old park and a lot of people ride it! Everyone loves it so having something like that would be awesome!

No volcanoes, because there are skateparks close by that have them.

Good transitions for ramps

Don't destroy the last vert park in NWI

fly box make it so you can get speed to it

manual pad

Multiple Euro Gaps

Flat

Parent note: shade, seating, water fountain, toilet

A good half pipe like the one the current crown point skatepark has now is needed

the snake run would be good for older skaters, maybe mellow, not taller than 3 ft

bank to medium box flat, quarter pipe on top

Highland has a 6 and a 3 stair...hessville has an extended 7...I guess that's something to keep in mind. Would hate to see stairs overdone at a park...leave the stairs to the streets

Fun

Bathrooms, water fountains

Hip; Quarter to Bank

Hip quarter to quarter

Nice mini ramp with good transition

Big box jump(fun box)

Big box jump- fun box

Bowl with lots of hips 6 to 7ft deep

Water fountain/vending machine

Foam

Euro

Long ledge that is good for learning tricks, not too small though because we don't need a small manny pad

Stairs

Concrete ramps, NOT aluminum coping

Big bowl

Big box(fun box)

3ft mini

A couple of quarter pipe would be cool because we have some at the park right now and it helps make the park flow so some quarter pipes are needed

Jump box needs to be wide so that bikers do not feel as though they will miss the landing.

Boxes/ramps in line to go over many In a straight line

Leave it vert

Handrail- intermediate level

half pipe with vert I think you guys could incorporate this feature in the bowl.

manual pad with step up manual pad

A Good Bump to Ledge

Concrete

Need a good wide spine that can be jumped or grinder across. There are no good wide spines around

hip

Bowls rule. Lets see some pool coping!!! Shallow and deep end? Give us Something different that hessville's krush bowl...

To

Shade

Street spine 4 to 5 ft

Really nice box with good transition

Bigger quarter with vert

Bigger half pipe/bigger box

Rails not super tall and not steep

Nice fly out

Gap

Long circle flatbar

A nice small, long, one foot flatbar.

Bowl

Bump to rail!!

Box jump

Big quarter with vert

Spine Not too steep but just enough

I would love a bike spine, our spine is cool but it could be so much cooler even if the spine was just a bit bigger than our spine it would be sick, I will be super upset if the new park doesn't have a spine! You've got to put a spine :)

No hubbas or obstacles on the wide jump box.

I haven't skated this park for years to watch it be destroyed I won't let it be changed to a street park there's enough at the other surrounding parks I don't care if i have to go to the district and create petitions I'm gonna trust you guys will do what's Mini- with a spine like the one that was located in Crown Poknt. It was absolutely perfect until they let it go to ruin.

quarter pipe with extension

Good Transition

Concrete

A big long bank to wall with a long transition would be awesome. There are no big wall rides anywhere

gap with hubbas

Please DONT build a street plaza. A lot of people will be really bummed.

Skate

SNAKE RUN!!!! (HUGE)

8 ft quarter to fun box to long 6 ft quarter

Nice kinda big a-frame

Have bigger ramps

Have bigger ramps in general

More ramps than rails

The mini ramp i

Spine with a hip

A frame rail in the middle

A good stair for learning tricks down stairs. Maybe 2 sets so one can be larger than the other. The idea should be to get your tricks down on the small one to take down the big one.

Ledge

Ledge over gap!!

Spine
